Summary

From my childhood, I was very fond of computers. Although I did my bachelor's in Pharmacy, I always wanted to do something related to computers. With proper guidelines from the web development course, I have taken I pursuing my goal to become a web developer.

Skills

HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript ES6, ReactJS

Projects

1. Image Search React App

04/2023 - 04/2023

- This is a React app where users can search pictures by writing a search term in the input field and pressing enter.
- Unsplash API is used in this project.
- By doing this project I have learned how to get input values in React.
- **Code:** <https://github.com/wali55/pics>
- **Live Site:** <https://react-search-images-app.netlify.app/>

2. Animal Show React App

04/2023 - 04/2023

- This is a React app where the user can click on the 'Add Animal' button and a picture of a random animal will be displayed on the screen.
- Users can add as many animal cards as they want.
- When the user clicks on the animal card the heart icon of that particular card will increase in size.
- By doing this project I have learned React's event system, state system, and list building.
- **Code:** <https://github.com/wali55/animals>
- **Live Site:** <https://animal-show-react-app.netlify.app/>

3. Smile

11/2022 - 11/2022

- Built a concept website for a dentist with the help of React. Built the authentication system (for email-password and also sign-in with Google) using Firebase. After users register and logged in they can fill up the appointment form.
- **Code:** <https://github.com/wali55/assignment-ten>
- **Live Site:** <https://assignment-ten-ef009.web.app/>

Education

Shizuoka University | Shizuoka

Biological Science | 09/2018

I studied for 6 months as a research student in Biological Science at the Shizuoka University in Japan.

East West University, Bangladesh | Dhaka

Pharmacy | 06/2016
